Art Unit: 1724

Prosecution before the Primary Examiner is hereby reopened, the Final Rejection dated January 13, 2006 is withdrawn, and the proposed amendment filed April 12, 2006 has been entered.

The following is a quotation of the second paragraph of 35 U.S.C. § 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 14-25 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which Applicant regards as the invention. The recitation that the housing of the filter assembly is "connected" to lubricant fluid (claims 14 and 21, line 3) is deemed to be misdescriptive and/or indefinite, since it is not apparent that a housing can be structurally connected to a fluid. Applicant is advised that an amendment positively reciting that the housing is connected to a lubricant fluid inlet conduit of a turbomachine, as disclosed in ¶ 0019 of the specification, would overcome this rejection.

Claims 14-25 would be allowed if amended to overcome the above rejection under 35 U.S.C. § 112.
